

Alamo Heights Language Arts Expectations

Spelling

Students need to develop strategies for writing words fluently and accurately so they can clearly and articulately express their knowledge, opinions, and ideas in authentic writing situations.

In grades K-2, students develop **print awareness** through the understanding that print is organized in a particular way, knowing that print is read from left to right and top to bottom, knowing that words consist of letters, and that spaces exist between words. They build **phonological awareness** through blending, segmenting, and manipulating word parts and sounds. Students use the relationships between letters, sounds, and patterns to decode and spell.

In grades 3-5, students build **vocabulary** by focusing on word context and conceptual categories. The focus of Word Study is not on the memorization of specific words and definitions, but on building readers with the skill set necessary to comprehend unknown words when reading. Students also learn to recognize **patterns in multisyllabic words** in order to apply those patterns when reading and writing.

Alamo Heights Instructional Expectations

Expectation	Practice
A focused, explicit approach is required for students to develop solid spelling skills.	15 minutes devoted to spelling instruction and practice during the school day
Teachers will use research-based practices including phonemic (regular words), whole word (irregular), and morphemic (word parts) approaches.	Spelling words from letter-sound patterns, high-frequency words, and morphology (Greek and Latin roots, affixes)
Ongoing diagnostic spelling assessments and daily writing observations inform spelling	Beginning and end of year WTW assessment Ongoing pre-, formative, and summative

instruction.	assessments
Teachers differentiate instruction and connect spelling word study to reading and writing.	Differentiate by content (different words), process (different strategies and/or different time), product (assessments and daily writing)
At the core of spelling instruction, students are readers and writers. Students will have many opportunities to read, talk, and write about words.	For example, looking closely at their writing, students talk about spelling in conferring with their teachers.
Chosen instructional resources should be researched-based, flexible, and allow for teacher and student choice.	Scholastic spelling, WTW, Journeys/Senderos and/or Phonics Dance
Classrooms have spelling references easily available to students.	Such as spelling journals, anchor charts, digital and print dictionaries, and word walls

Instructional Ideas

Differentiated Instruction

Students may only need a few days with some lists of words, but may need 10-12 days for other lists. In addition, an appropriate level of challenge for some students may be 10 words and for other students it may be 20. In AHISD, teachers are expected to use a variety of best practices to explicitly teach spelling strategies throughout the year.

Word Lists

When constructing word lists for study, consider:

- Anchor words that follow a pattern or generalization that is appropriate with respect to the child's developmental spelling level

- High frequency word (no excuse words)
- Specific words chosen for/by the student

Make sure students can read all of the words before including them on the list.

Spelling by Analogy

Meaningful pattern making is what the brain does innately. It is easier for students to use onsets and rimes, analyzing words by breaking them into meaningful chunks or patterns that only rely on memorization.

In a syllable, the onset is the letter(s) before the vowel; the rime is the vowel and the letter(s) that follow it. (Ex: in that, the /th/ is the onset and 'at' is the rime. Knowing just thirty-seven rimes allows students to generate five hundred basic words. Help students understand "If I know 'ake' in cake, then I can quickly figure out words such as lake, take, and stake."

Suggested prompts:

- What do you know that you can use to help you?
- What do you notice?
- What do you hear?
- What stays the same?
- What letter(s) or sounds do you need to change to make a new word?

Teaching students how to use rimes strategically is very different from our instruction of what we used to call word families, in which kids were presented with all the words that fit a pattern (through flash cards or a list) and were expected to memorize them after seeing words over and over again. Teaching words by analogy is a thinking, meaning-making process

Memorizing Words

For children to become competent spellers, some words just have to be memorized, but memory alone is insufficient. The best word study combines memory with conceptualization and meaningful practice.

Example: If you notice students misspelling house, conduct a quick lesson to help students memorize the word. Ask students to write "house" on their individual whiteboards. Then, work in small groups to decide on what they think is the correct spelling. After two minutes of group

discussion, during which you walk from group to group listening to the conversations and doing some prompting, take the preferred spelling from each of the groups, write each on the board and talk about the spelling, asking the following questions:

What do we all agree on? (put a check over the letters common to all of the spellings)

What do we already know that we can use (talk about how the "ou" sound can be spelled "ou" or "ow")

What "ou" pattern looks right here?

Is the silent e at the end of one group's spelling correct?

How can we check our spelling?

Once you agree on the correct spelling, quickly review the "tricky" part -the "ou" and the silent e. Although the students are memorizing the word, it is not memorization by writing the word over and over again.

Word Hunts

Word hunts are a good activity for reinforcing phonics and spelling patterns. Select a pattern from a shared reading or writing you have done with students or from a guided reading group lesson.

Working individually or with a partner, students record words that fit a pattern that has been studied, and notice how words are alike and different. Some teachers have students record their finding on sticky notes to add to a class chart or in a Word Study Notebook.

Word Study Approach

Look-Say-Cover-Write

The following is a well-accepted approach. Be sure to model the sequence first and engage kids in conversation so that this strategy is rich and interactive, not a dry and boring lockstep process.

- Look - Notice shape, patterns, visual features, and tricky or surprising parts of the word. Try to visualize the word. Ask, "what do you notice" about this word?" "Does anything surprise you?" Why?" Get discussions going. Investigate.
- Say - Say the word to yourself. Say the word slowly. Break it into syllables.
- Cover -Visualize the word.
- Write - Say the sounds as you write the word.
- Check - If your spelling is incorrect, note confusion. Repeat the word study sequence until the word is learned.

Word Sorts

A word sort is an activity that requires students to group words into different categories. It involves sorting words written on individual cards into piles based on some criterion or contrast. Typical word sorts foster thinking and discussion about how words are alike or different and can be used to help students make generalization about how words work. Word sorts also focus students' visual attention on words. Students have to be able to read the words in order to sort them. As students sort, they have to look deeply at the word.

Sorts can be open or closed: that is, students can decide how to categorize and sort the words (open sort) or teachers can determine how the words are to be categorized and sorted (closed sort).

Word Work with Tiles

Use one-by-one inch white glazed ceramic or plastic tiles to involve students in "Making Words" activities a couple of times a month. These activities take approximately ten minutes in a large group or may be used in smaller guided reading groups. Each group is supplied with a small tub of tiles, and each student is given a dry erase marker and a wiper. First ask students to take a few minutes to do some exploratory writing on the tiles and to become accustomed to manipulating them.

Then choose a pattern or rule that the class has been working on and ask students to spell a word with that pattern. (All members of the group have to come to agreement on the spelling). Walk between groups guiding and prompting. Ex: for a focus on "ar" begin with the word "*part*" and move to "*party*", then "*parting*", then "*partner*" and "*apartment*". Students also like to work on challenge words such as "*varnish*" or "*sardine*", and perhaps super challenges such as "*tarpaulin*". When groups disagree about spelling they should use resources necessary to determine the correct spelling.

The tiles also work well with struggling readers. Having to write letters as well as manipulate them seems to facilitate word learning.

Spelling Strategy Poster

As students discover different strategies good spellers use when they want to spell a word correctly, record these on a poster. Strategies may include:

- Circle the misspelled word and come back to it.
- Try writing the word another way until it looks right. (First note which parts of the word are correct by putting a check mark over those letters.)
- Use what you already know (spelling pattern or rule, small word within a bigger word, or word meaning).
- Stretch out the word slowly and listen for all the sounds.
- Picture the word in your mind and think about the order of the letters.
- Ask a friend.
- Look around the room – in a book or on a chart or word wall – or anywhere you remember seeing the word.
- Check the dictionary (if you are sure about the first few letters).

Proofreading Strategies

- Start at the end of a piece of writing and read backward toward the beginning. Circle words that do not "look right".
- Teachers may make a dot or a small check mark in the margin of a piece of student writing if a child has misspelled a word wall word, indicating that the student needs to go proof read that line of text to locate the misspelled word and "fix it up".
- MODEL, MODEL, MODEL how to reread for different purposes. One purpose is to make sure words are spelled correctly for the reader.

Vertical Progression of TEKS

Kinder	<p>18(A) Use phonological knowledge to match sounds to letters</p> <p>18(B) Use letter sound correspondence to spell consonant-vowel-consonant (C-V-C) words (e.g., cut)</p> <p>18(C) write one's own name</p>
1st	<p>22(A) use phonological knowledge to match sounds to letters to construct known words</p> <p>22(B) use letter sounds patterns to spell</p> <ul style="list-style-type: none"> (i) consonant-vowel-consonant (CVC) words (ii) consonant-vowel-consonant silent e (CVCe) words (e.g., hope) (iii) one syllable words with consonant blends (e.g., drop) <p>22 (C) spell high frequency words from a commonly used list</p> <p>22 (D) spell base words with inflectional endings (e.g., adding "s" to make a word plural)</p> <p>22 (E) Use resources to find correct spelling</p>
2nd	<p>23 (A) use phonological knowledge to match sounds to letters to construct unknown words</p> <p>23(B) spell words with common orthographic patterns and rules</p> <ul style="list-style-type: none"> (i) complex consonants (e.g., hard and soft c and g, ck) (ii) r-controlled vowels (iii) long vowels (e.g., VCe- hope) (iv) vowel diagraphs (e.g., oo- book, fool; ee- feet),diphthongs (e.g., ou- out, ow-cow, oi- coil, oy-toy) <p>23(C) spell high frequency words from a commonly used list</p> <p>22 (D) spell base words with inflectional endings (e.g., -ing and -ed)</p> <p>23 (E) spell simple contractions (e.g., isn't, aren't, can't)</p> <p>23(F) use resources to find correct spelling</p>
3rd	<p>24(A) use knowledge if letter sounds, word parts, word segmentation and syllabication to spell;</p> <p>24(B) spell words with more advanced orthographic patterns and rules;</p> <ul style="list-style-type: none"> (i) consonant doubling when adding an ending (ii) dropping final "e" when endings are added (e.g., -ing, -ed) (iii) changing y to i before adding an ending (iv) double consonants in the middle of words (v) complex consonants (e.g., scr-, -dge, -tch) (vi) abstract vowels (e.g., ou as in could, touch, through, bought) <p>24(C) spell high frequency and compound words from a commonly used list</p> <p>24(D) spell words with a common syllable constructions (e.g., closed, open, final stable syllable)</p> <p>24(E) spell single syllable homophones (e.g., bear.bare; week/weak; rode/road)</p> <p>24(F) spell complex contractions (e.g., should've, won't)</p> <p>24(G) use print and electronic resources to find and check correct spelling</p>

High Frequency Words

Students need to have a core of words that they can read and write automatically. Typically, these words do not follow a pattern. The first 100 of these words make up half of all written English material. High frequency words should be spelled correctly when writing across all content areas.

Reading Expectations

Kindergarten students should be able to read at least 25 words on this list by the end of the year

1st Grade students should be able to read at least 100 words on this list by the end of the year.

2nd Grade students should be able to read at least 300 words on this list by the end of the year.

Spelling Expectations

In grades 1-3 students are expected to spell words correctly from a common high-frequency word list.

Students in grades 4-5 are expected to spell the words from previous grades correctly in their writing.

High Frequency Word Lists

This represents the high-frequency word list for the entire year. The list each year includes the high-frequency words from the previous year.
